SUMMARY

Project Manager with a Computer Science background and 4 years across software development and product delivery. Own prioritization for a software development team, translating company goals and business needs into clear requirements and delivery plans. Bring hands-on engineering experience that helps keep business and engineering aligned.

SKILLS

- **Project Management:** Prioritization, stakeholder communication, requirements and user stories, Agile/Scrum, release planning, cross-functional coordination, risk and dependency management
- **Technical Background:** Python, Java, Angular, TypeScript, Linux, SQL, Jenkins, CI/CD, Git
- **Tools:** Jira, Confluence, Figma, Figma Make, Excel (Power Query), ChatGPT, Claude

WORK EXPERIENCE

SBV Workforce Management, Monsey NY

Project Manager

Oct 2024 - Current

- Own prioritization for a software development team of up to 15 developers (now 6), deciding what enters and leaves developer queues based on company goals.
- Re-prioritized work as company goals and team size shifted, keeping developers focused on the highest-value work and giving management clear tradeoffs when planning releases.
- Write ticket requirements, breaking down tickets with developers before execution, getting answers from the business when requirements are unclear, so developers know exactly what to build.
- Serve as the central point of contact for requests across the team, routing each to the right people and unblocking work.
- Report project status to management using Jira and Git data, and flag delays early so plans can be adjusted.
- Call alignment meetings when priorities or requirements are unclear, and escalate team-level issues to management.

Broadridge Financial Solutions, Newark NJ

Software Developer: Python, Java, Linux, Jenkins

Jan 2024 - Oct 2024

- Developed and supported customer-facing financial reporting products using Python, Java, and Linux.
- Automated deployment and CI/CD workflows to improve reliability and efficiency.
- Resolved live production issues from investigation through resolution.
- Coordinated production deployments and release approvals across Engineering and Operations.
- Created technical documentation and system diagrams to improve communication and knowledge sharing.

Haven Technologies, New York NY

Full Stack Developer: Angular, TypeScript

Jan - Aug 2023

- Delivered features for a cloud-based Insurtech platform, collaborating across Product, Frontend, and Backend teams.
- Investigated and resolved high-impact production issues from diagnosis through resolution.
- Improved product quality by strengthening regression testing and CI/CD processes.

Full Stack Developer Summer Intern

June - Aug 2022

- Built and launched Angular UI components based on Figma mockups, closely collaborating with UX.
- Integrated a new design system into legacy code for visual consistency and maintainability.

EDUCATION

Touro University, Brooklyn, NY

Graduated September 2022

B.S. in Computer Science, GPA: 4.0

Recipient of Touro's Dean Scholarship and Academic Scholarship

Recipient of Touro's Outstanding Scholar Award
